In Special Reports, this week's files cover: Mars Structures, Electrogravitic Propulsion Systems, Egyptian Afterlife, Al-Qaida Could Have Nuclear Bomb, Flying Object Patton Movie, Australia Department of Defence has "lost" its UFO Files, and Argentina Air Force to Investigate UFOs

Unidentified Aerial Phenomena sightings were reported over California, Colorado, Florida, Michigan, Illinois, Maryland, Massachusetts, Missouri, Ohio, Oklahoma, Puerto Rico, Tennessee Texas, Virginia, and Washington.

UFO sightings were also reported in Argentina, Australia, Bangladesh, Canada, Israel, Italy, Northern Ireland, Sweden, and the United Kingdom.

The purpose of these files is to report the UFO eyewitness and photo/video evidence that occurs on a daily basis around the world and in space. These Files assume that extraterrestrial intelligent life not only exists, but my hypothesis is that the over a thousand UFOs reported each month represent technologically advanced spacecraft conducting surveillance of Earth. I personally became interested in UFOs when London Control ordered me to intercept one over England while flying for the US Air Force. Under Project Blue Book, the US Air Force investigated UFOs for more than twenty years; and we continue this research. **I believe the God of the universe has spread life throughout the cosmos and UFO's are visiting us in ever-increasing numbers.**

Special Reports

Mars Structures

David Martines noticed a mysterious rectangular structure that appears to be on the Red Planet's surface while trolling the planetary surface using Google Mars, a new map program created from compiled satellite images of the planet.

This is a video of something I discovered on Google Mars quite by accident," said Martines, the armchair astronaut, in a now-viral YouTube video. ***"I call it Bio Station Alpha, because I'm just assuming that something lives in it or has lived in it."***

He zooms in the surface anomaly — a long, pixelated, white object — and lists the coordinates as 49°19.73'N 29°33'06.53'W. "It's over 700 feet long and 150 feet wide. It looks like it's a cylinder or made up of cylinders," he says.

Some experts: "Bio Station Alpha" is simply a glitch in the image caused by cosmic energy interfering with the camera. ***"It looks like a linear streak artifact produced by a cosmic ray,"*** said Alfred McEwen, a planetary geologist at the Lunar and Planetary Lab at the University of Arizona. McEwen is the principal investigator of the High Resolution Imaging Science Experiment (HiRISE), a powerful telescope currently orbiting Mars. ***Cosmic rays are extremely energetic particles emitted by the sun and other stars. For the most part, the Earth's protective magnetosphere blocks them from hitting the planet's surface,*** McEwen explained. ***"But with space images that are taken outside our magnetosphere, such as those taken by orbiting telescopes, it's very common to see these cosmic ray hits. You see them on optical images and a lot of the infrared images too,"*** he told Life's Little Mysteries.

As a cosmic ray passes through a camera's image sensor, it deposits a large amount of its electric charge in the pixels that it penetrates leaving a bright streak on the image.

Google doesn't identify the source image. "I can't tell whether this image was taken by Viking or what," McEwen said. ***"The people at Google need to document what the heck they're doing.*** They should be able to identify what the source of their information is, and let people know so they can go back and look at the raw data." *Follow Natalie Wolchover on Twitter @nattyover*

Dr. Buchli writes, -- It is a definite structure and not a natural formation. Thanks to **Richard Buchli D.V.M. Phd. and Dorothy Buchli W.B.W.**

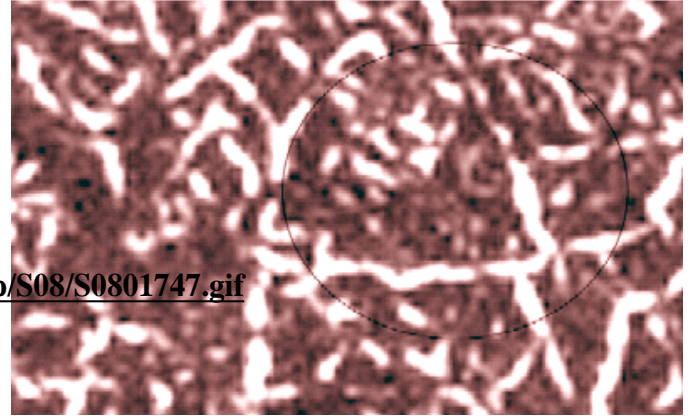

General Albert Stubblebine was the commanding officer of the US Army Intelligence and Security Command and is

Chairman of the Board of Directors of Psi Tech. *"He claims that his remote viewers have spotted structures underneath the surface that could not be seen by the Voyager cameras in 1976. I will tell you also that you can see machines on the surface of Mars and there are machines under the surface of Mars too.* You see what they are and where they are and find out a lot of detail about them. UFOs are tracked. We have looked at their propulsion systems. That was a hard job. We can track them back to where they came from, whether they came from a place here on this planet or whether they came from a place on another planet. *"They are traceable and you can take a look at them inside as well as on the outside. So this is a tool that can be used for UFO research. The machinery is moving, but I don't know if it's from a left over civilization or if it has a long life battery. These machines and structures are both on the surface and underneath the surface of Mars.*

http://www.thelivingmoon.com/41pegasus/12insiders/Albert_N_Stubblebine_001.html

Norman Bryden writes, *"The Mars image above shows what appears to be a group on buildings on a street corner. You can make out domes and other geometric shapes similar to windows and platforms. This is part of a Mars Global Surveyor image that seems to show a city on Mars:*

<http://www.marsstructures.com/0005.html>

Egyptian Ideas of the Afterlife

In his scholarly book, *"Egyptian Ideas of the Afterlife*, British Egyptologist E.A. Wallis Budge said that the ancient Egyptians were preoccupied with life beyond the grave and that over thousands of years ancient Egyptians had a wealth of ideas and beliefs concerning immortality, the afterlife, the God Almighty, resurrection and immortality. Ancient Egyptian records described *a fleet of UFOs*.

Electrogravitic Propulsion Systems

The subsystems of propulsion that are categorized for this prospectus can be reduced to the following categories:

1. **Plasma Propulsion;**
2. **Electrogravitic Systems;**
3. **Magnetohydrodynamic Systems.(*Floating disc experiment.*)**

In reality the above mentioned systems are so closely interrelated that some persons might say that the sub-divisions are splitting hairs. Be that as it may, the technical requirements for comprehension of functionality are not excessive. It does not require engineers with doctorate degrees to design and build these systems. It has been stated, "*If you can design a Tesla Coil, you can build an Exotic Propulsion System craft.*"

The History of Exotic Propulsion Systems:

The bulk of the numerous patents that have been issued in the United States, Britain, and Canada over the last 100 years for electrogravitic and magnetohydrodynamic propulsion patents are merely rehashes of the same principle of physics—that a high voltage discharged as impulses can be harnessed to defy gravity and propel at velocities far in excess of those achieved by conventional aircraft.

Thomas Townsend Brown is the most prominent early figure in the recovery of actual data regarding electrogravitic propulsion systems in the United States. Many historians trace the source of the work to Nikola Tesla his role model and inspiration. Brown is credited with the discovery that high voltage impulses in a capacitor will cause that capacitor to lurch in the direction of that capacitor's North Pole; this discovery is recognized in physics as the "*Biefield-Brown Effect.*"

Henry W. Wallace, another important figure in Exotic Propulsion Systems, discovered that high speed rotation of elements with odd nuclear spin values cause directional movement that is neither centrifugal nor centripetal motion. It appears from the numerous patents on these Exotic Propulsion Systems that elements with odd nuclear spin values increase the propulsive effect regardless of whether the high speed rotation method or the high voltage electrical impulse method of Brown are used. Through Brown's work, high speed electrogravitic propulsion is realized, but it is through Wallace's work that the ability for a human being to withstand the high-G maneuvers that Exotic Propulsion Systems (EPS) craft perform is realized. Put simply, the occupants of the EPS craft are shielded from gravitational and inertial forces. By altering the magnetic field gravity may be overcome. - [Wikipedia, the free encyclopedia](#)

Al-Qaida Could Have Nuclear Bomb

U.S. intelligence Chief James Clapper says terrorism is the top national security threat facing the U.S. homeland, and its allies. Al-Qaida has the time, materials and talent to assemble radioactive "dirty bombs, according to leaked documents obtained by the [London Telegraph](#) newspaper.

The cables, released on the WikiLeaks website, reveal that NATO security chief's briefed leaders in 2009 that al-Qaida had an active unit assembling "*dirty radioactive improvised explosive devices (IEDs)*" using rogue nuclear scientists.

The makeshift nuclear bombs, which could be used against soldiers fighting in Afghanistan or against cities of the West, would contaminate the surrounding area for years to come, the Telegraph reported. The security officials also told leaders that al-Qaida papers found convinced

security officials that "greater advances" had been made in bio-terrorism than was previously feared. The leaked reports also gave examples of nuclear smuggling. One memo detailed how a freight train on the Kazakhstan-Russia border was found to be carrying weapons-grade material while a "small-time" dealer in Lisbon tried to sell radioactive plates stolen from Chernobyl, the Telegraph reported. Thomas de Maiziere expressed his fear that terrorists could use "children's articles to introduce bombs into airplanes." Thanks to the UK Telegraph

Flying Object Patton Movie

My son and I were watching the movie Patton on Netflix and noticed a strange object that appeared in the sky during one of the scenes behind George C. Scott.

The object appears at approximately the 28:45 mark of the movie located in the sky of the upper right hand portion of the screen. Attached is a crude video we made of the movie as shown from our laptop computer.

Thanks to MUFON CMS

Australia Department of Defence has "lost" its UFO Files

COULD there be any better fodder for Australia's conspiracy theorists? For decades, Defence officials dutifully investigated an unknown number of UFO sightings being reported all over the country. Intelligence officers attached to the Royal Australian Air Force checked the known movement of aircraft against reported sightings, and politely responded by mail to everyone who claimed they saw floating lights or flat saucers or streaking vapor trails. Some of the files were marked as classified.

Last year, the British government released a large part of its dossier on unidentified flying objects after significant pressure from freedom- of-information applicants. More than 4000 pages of Defence Ministry documents, detailing 800 reported encounters during the 1980s and 1990s were posted online.

Fairfax sought access to the Australian version. But the response was more surprising than what the files might have contained - the material has largely gone missing. The department spent two months searching its offices for files that would be captured by the *Herald's* FOI application, which sought a "schedule of records held by the Department of Defence which relate to unidentified flying objects".

But in late May, the department's FOI assistant director, Natalie Carpenter, delivered a reply that seemed almost designed to set online chat rooms alight with conspiracy chatter.

The only file Defence was able to locate was titled "Report on UFOs/Strange Occurrences and Phenomena in Woomera"; the others had been destroyed.

Argentina Air Force to Investigate UFOs

Diario Tandil Newspaper reports the Argentinean Air Force has launched a commission to investigate the UFO phenomenon. Tandil has been in the news due to alleged "sightings of unidentified flying objects and may become the subject of investigations by this new commission? The brand new Comisin de Investigacin de Fenmenos Aeroespaciales, as it has been dubbed, will be formed by civilian personnel and experts from the Fuerza Area Argentina (FAA) whose mission shall be to "conduct a scientific study of aerospace phenomena. (*Fighting Hawk Aircraft*)

Over many years, Tandil has been in the news due to alleged UFO sightings including photographs taken last year. Tandil has been mentioned more than once by UFO researchers. Many of them -- according to their theories and their personal truth -- state that the city is a "transit corridor for extraterrestrial flying objects. Determining whether this is true or not is a task for the new commission created by the Air Force. (*Translation (c) 2011, S. Corrales, IHU. Special thanks to Guillermo Gimenez, Planeta UFO*)

Sighting in the United States

California Five Dimly Lit Lights

LAKEWOOD -- I looked up to see the stars on June 3, 2011, and straight overhead saw five large dimly illuminated lights in the shape of a V' heading in a SSE direction. The flying object flew a few hundred feet in altitude, moving at 60 mph, about the size of a 737. A helicopter was flying about half a mile away and that's the only sound I could hear. I could just see the lights and it was very dimly lit, so the sighting was only about 15 seconds long. I live about 25 miles from LAX and about 10 miles from LGB. This object was nothing close to anything I've ever seen. I lost sight of it due to its dimming quickly. Thanks to MUFON CMS

Colorado Triangle Photo

Fort Collins -- My Family and I were having a very late Christmas celebration and went outside to take some photos of the kids by a snow fort on February 9, 2009. My sister in law and my brother pointed at something they thought might be a hang glider. I saw it in the western distance and took a few close-up photos of it. I do recall that it seemed to be flashing from underneath but I didn't photograph any light coming from it. It actually seemed to be rotating. I used my binoculars to see a covering of octagonal bumps like you find on the shell of a sand turtle. In the last photo you can enlarge it and see the stripe at a horizontal angle. Thanks to MUFON CMS

Colorado Blue & White flashing UFO

Englewood -- My buddy and I were driving east bound on highway 285 near Simms St on May 27, 2011, at 11:26 PM. My buddy noticed a weird object hovering about 125 feet off the ground. It was a long cigar shaped object flashing white lights, then blue lights, and white. It would shoot up and down at rates of speed no human structure could ever pull off, then it would shoot right really fast and up and down. At the end of the sighting it zipped from around Simms St. West towards the mountains, west about 3-4 miles away in about 3 seconds flat. Thanks to Peter Davenport, Director National UFO Reporting Center <http://www.UFOcenter.com/>

Westminster -- I saw a small white orb moving north, at 5:45 PM on June 7, 2011, from a position near the moon. I took some photos which I have attached. The photo was enlarged.

Note: The photos were taken with a Kodak Cx7530 Zoom Digital Camera with a maximum resolution of 5 million pixels. The photos sent by the witness appear to have been "cropped." I have written to the witness to obtain the original photos. Updates will be posted. The orb was not a weather balloon because the local weather balloon wouldn't have been launched until 6 PM MDT. Also the orb was not drifting with the wind because the lower level winds

were in the opposite direction. Therefore the orb would not have been any type of balloon or unpowered flotation device.

Florida Maneuvering UFO and Six Red Lights

PENSACOLA -- I have video of an object on security tape taken June 3, 2011. Don't know what it is and don't claim it to be from another world. You can review the video and make your own determinations. I'm curious for an explanation of what the camera caught. I just observed this transparent object and pressed the record button and noticed the object on the camera monitor... The object was moving up and down above my car and would move from left to right which caught my attention. Thanks to MUFON CMS

Six reddish-orange glowing balls of light were seen in the skies on New Year's Eve 2011. They were jumping spontaneously and would re-align back in formation. Have very clear video evidence, very interesting with no logical explanation.

Thanks to MUFON CMS

Illinois Rectangle with Square Lighted Windows

BEMENT -- My sister and I were outside jumping on our trampoline. It was beginning to turn dark. I had just seen a plane go by in the same direction, and then I turned my head toward my house. The next thing I knew when I turned back, a turquoise glowing cigar-shaped object with diamond-shaped dark yellow-orange sparks emitting from its rear traveled at a remarkable speed at a 45 degree angle downward, in the direction of a nearby cornfield.

My drawing of the object.

From what I saw, this thing appeared to be crashing. I lost sight of it as it moved behind a tree heading straight downwards, and did not have smoke or a visible fuse. Plus, the cigar split into two equal cigars with very little distance between them. I have a graphic design program on my computer, so I will try to recreate the object for you. Thanks to MUFON CMS

Highland Park -- I live a block away from Lake Michigan shoreline and around 10:30 pm on May 17, 2011, I saw the

shape of the windows leads me to believe that it probably had the shape of a rectangle with four lit up incandescent rectangular windows. It was not moving and as I approached my house I lost sight of it because my home is at the bottom of a small hill and the trees blocked my vision... Thanks to Peter Davenport, Director National UFO Reporting Center <http://www.UFOcenter.com/>

Kentucky Disc

Bowling Green -- On May 22, 2011, I took some photos and later when I looked through my pictures I noticed this possible UFO. I don't recall seeing anything in the sky that day. The object in question is located in the upper right corner and has been enlarged. The camera is a Coolpix s 8100. Thanks to MUFON CMS

Louisville—On June 3, 2011, 11 PM, this was reported to 911 and Fox 41 News We live near the airport; but what we saw was *not* normal behavior for aircraft. My seven year old child and I saw what appeared to be an orange color hot air balloon like the moon when it appears close to earth? We literally saw flames just like on a hot air balloon but it was much too large to be a balloon. It moved at a steady pace toward the river far too quickly and steadily to be a balloon. It just glowed steadily with what looked to be flames on the bottom of it.

Note: Skies were mostly cloudy at 20,000 feet at the time of the sighting. Winds were from the southeast at 5 MPH. The winds aloft were from the south to southwest in the lower 5,000 feet of the atmosphere. If the object was at or below this height, then it would have been moving with the wind. Above 5,000 feet winds shifted around to a westerly direction. Thanks to William Puckett Director UFOs Northwest <http://ufosnw.com>

Maryland Disc

Walkersville -- I was sitting on my deck facing south about 1/2 mile from Route 15 north of Frederick. I noticed a bright light move above the tree line, and then it went back down again, until I couldn't see it. A friend of mine in Thurmont MD could see it as well. I snapped a picture with my iPhone camera, and ran to get my digital camera, and filmed about 41 seconds of it. It appeared a few more times, and then didn't come back anymore. Thanks to MUFON CMS

Massachusetts Disk

Gloucester -- Driving on the main road I saw a saucer-type craft floating about 500 feet above the ground on May 18, 2011, at 12:30 AM. The saucer had very fast movement upon departure from our area. Duration of the sighting was 20 minutes Thanks to Peter Davenport, Director National UFO Reporting Center <http://www.UFOcenter.com/>

Missouri Multiple Color UFO's

St. Joseph -- My dad and I were looking at the stars laying on the ground on May 31, 2011, when we saw a circle shaped UFO travelling at a high rate of speed. It was circle shaped and was blinking from red to green to white. It moved across the sky very fast and changed directions. We saw a total of four crafts that were all similar in their blinking colors. We are not sure it's a UFO but everything it did was the same as the from NASA website videos describing UFOs. Thanks to Peter Davenport, Director National UFO Reporting Center <http://www.UFOcenter.com>

Ohio Lights

NORTH RIDGEVILLE -- We were at the Autorama Drive-in theatre on May 21, 2011, around the beginning of the movie we saw five or six round lights appear to the right of the movie screen. They all seemed to float together staying about the same distance apart and flew behind the movie screen, then to the left of it. They stopped and slowly faded to small lights, then nothing. You could hear other people saying things like "*what are those strange lights?*" from other cars. I checked on face book and the newspapers the next day to see if anyone reported it, and apparently not. Thanks to MUFON CMS

Oklahoma Large red elliptical shapes

It was about 11:10 PM, on June 4,-2011, when my wife took the dog out and came back in demanding that I get up and come to see "*something wrong with the sky*". She pointed at numerous large red elliptical shaped objects moving north at the speed of a slow moving helicopter. These objects were red in color, with a constant red glow. The objects all moved at the same rate of speed, same direction and at the same altitude staying in formation. When these objects came to a point in the sky, the lights would turn off. I could make out an outline of a rectangular like shape briefly before it was obscured by trees. I know Memorial Drive is a common approach land mark for planes flying into TIA however, these were not planes. There was absolutely no noise coming from there 25 or so lights. One grouping had a formation five objects. Thanks to MUFON CMS

Puerto Rico UFO Witnessed Over Ramey Air Force Base

RAMEY AFB -- During the Cuban Missile Crisis, our B-52's, KC 135's, and U2 planes formed a net around Cuba in the air, and the navy controlled the seas. Transport troop carriers were parked on the taxi-way ready for drop on missile sites in Cuba.

At 5:30 am, while waiting for relief on the taxi way, I noticed off in the distance over the Caribbean Sea an unusual cloud, with flashing lights within it. My canine flight and I watched and radioed each other to try to figure out what it was, because the trajectory of the cloud was headed towards the no fly zone. The relief arrived, and we were picked up and driven across the active runway, still watching the object headed towards the parked B-52's alert area.

When we arrived at the armory within the restricted area, the cloud was there. It was drifting thirty feet above the ground, approximately 6 feet thick and 30 ft in diameter. Dark swirls of clouds and lights swirled around the object. The only thing that was visible was the lights spinning inside the dark swirling cloud like a carousel that were green, orange, yellow and blue. Our entire alert crew came out of the mole hole to watch. There were many mechanics, other flight crews and airmen observing as well. The object passed us and headed towards the U2 hanger, which was strictly off limits. My only concern was that nobody shot at whatever this object was. We all had our firearms, standing there watching it until it disappeared.

After the incident I went off duty for 3 days leave. Nobody told me not to talk about it. The only person I told was my mother. After the Ramey Air Force Base was decommissioned, I told my sons. Thanks to MUFON's Case Management

Tennessee Triangle

Nashville -- I took this photo at the corner of Riverside Drive and Eastland Avenue at 9:44 PM, on June 5, 2011, with my HTC Thunderbolt Phone camera. There was a large triangular form with lights at each point. It appeared to be massive, over a football field in size. It also appeared to be over the river or close to it. It gained altitude while rotating clockwise and the "faded out" while heading NW. The rear lights faded before the front one.

My wife and I were driving home when wife points to the left over some trees at these three lights. We stopped and I got out my phone and took the photo

I realized that at least seven cars had stopped and were watching. It lasted three minutes from when we first spotted it. After it faded everyone was just in shock and got in their cars and left. Thanks to William Puckett, Director <http://www.ufosnw.com>

Texas Disc

FORT WORTH -- I went outside after the storm on May 24, 2011, and took several pictures with my cell phone but did not see anything strange other than the cloud formation. Two days later I was going over my photos and I saw this spot on the phone and that's when I noticed this object I would hope someone would come and investigate and tell what they think. Thanks to MUFON CMS

SAN ANTONIO -- A UFO was caught on camera on May 22, 2011, at 8:15 PM, at the Drury Hotel where I am looking southeast on the 23rd floor.

I am using a tripod a Canon 30D Camera with an 18-55 mm Canon lens that I have balanced on a window ledge facing the southeast (through glass).

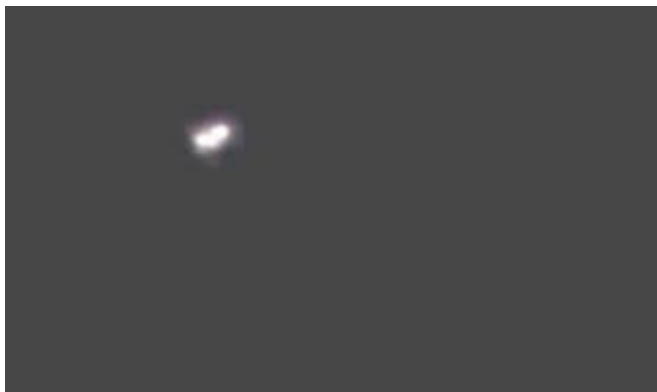

When I first set up I noticed the florescent lighting in the room was bouncing off the glass and right into my lens. The hotel had adjustable curtain/shades that are normally used to hide the morning sunlight. I pulled that same curtain/shade over my head and blocked out all of the fluorescent lighting and glare from the

room. Thanks to Peter Davenport, Director National UFO Reporting Center <http://www.UFOcenter.com/>

Wichita Falls -- Photo taken in Northern Texas Photo of Airborne Silver Object.
Analysis Clearly Indicates That This Photo Has Been Edited.

SAN ANTONIO -- A UFO was caught on camera on May 22, 2010.

Note: The light was not ball lightning. Ball lightning is only visible for a second or two. UFO activity has been reported over the years near Bangor Submarine Base. Thanks to William Puckett Director UFOs Northwest <http://ufosnw.com>

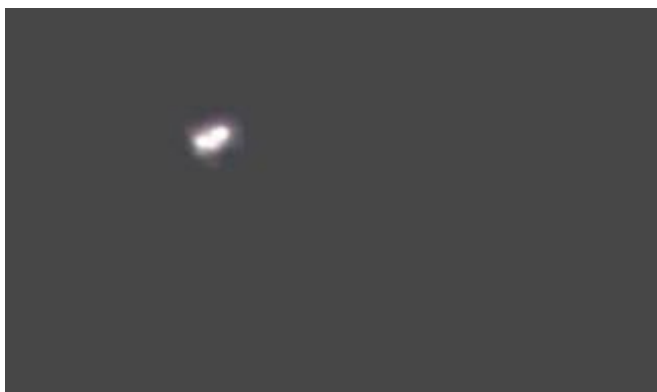

Virginia Moon Object

NEWPORT NEWS -- The date and time are pretty much forgotten, but that information will be in the picture data. I was trying to take a photo of the moon, using a Nikon D60 Gold Edition 10 megapixel camera. As I didn't want to shake or jar the camera, I used the timer button to take the picture so my button pushing wouldn't shake the camera.

I had it on manual setting, except for focus, so I had a longer shutter opening than normal. I stood next to the camera as it did its job, watching the sky, the moon, etc. I only saw the moon. I had no idea that a strange spot of blue light was in the picture until I loaded it into my computer and zoomed in. Oddly, when the object is magnified, it seems to take on the shape similar to the space ship that was wrecked at the beginning of the movie "Alien"... Thanks to MUFON CMS

Washington Flying Object

Seabeck -- On June 2, 2011, at 10 PM, I took the video on my cell phone I have seen ball lightning before around Mt Rainier and the Olympic Mountains, but it didn't look like that. The light was coming from the direction of Bangor Submarine Base. It had shape to it. A jellyfish shaped light was coming from it. A half hour later a few large planes passed through that area of the sky. It looked like it might be some electromagnetic phenomena. I don't think a solid craft would fly that sporadic.

Note: The light was not ball lightning. Ball lightning is only visible for a second or two. UFO activity has been reported over the years near Bangor Submarine Base. Thanks to William

Worldwide Sightings

Australia Orb and Tasmania Object

QUEENSLAND -- We were at a mate's home on April 21st, 2011. At around 4:35 AM, we took this ten minutes long clip even though we were all wasted, hence the language is crap that we were talking.

<http://www.youtube.com/watch?v=iesQwVs8JBs>

Ufo Sighted Over Tasmania for Days

Mayfield -- Brendon Hill first saw the flashing lights on May 30, 2011, at night from his backyard balcony at Riverside. He then witnessed the same lights on Saturday night. *"On Thursday I dragged my three mates outside to show them and they were bewildered - none of them could describe what they saw or could come up with an explanation of what it was,"* Mr Hill said.

Mr Hill looked at the site of the flashing lights through his binoculars the next day and said he could not see anything that would generate the same pulsing light. *"There are no buildings or towers in that area that could generate that much light - it was very strange how I couldn't see anything during the day,"* he said.

On Saturday about 9 PM, Mr Hill saw the flashing lights again and this time caught them on his video camera. *"It made my hair stand up on my neck,"* he said. *"It seems so inhuman, it doesn't resemble anything I have seen before and after seeing it with my own eyes it feels very spooky."*

A Bureau of Meteorology Launceston spokesman said no sightings of Mr Hill's description were reported to the office. However, there were reports of the Aurora Australis - or southern lights - which sends bright green and red lights flashing across the sky. *"The Aurora is more of a swirling, wave-like look across the whole sky: it does not sound like his description,"* the spokesman said. Mr Hill said he had no reason to believe it was anything man-made.

"I don't mind if it turns out to be something really boring because it would put my mind at ease," he said. "It's annoying not knowing what it was. My mind keeps ticking over trying to figure out what it could be." Thanks to the Truth behind the Scenes and the Examiner. Thanks to Ken Pfeifer MUFON New Jersey www.worldufophotos.org

Bangladesh Disc Shaped Cloud

Dhaka -- Hoping for a tempting breeze, I went up to the terrace alone to the 5th Floor of my cousin's house and noticed a

small disc shaped cloud with a light green lining hovering there in a particular diagonal path across the night sky at 9:20 PM, on May 4, 2011.

As I was roaming around I noticed the light flew around and above. A clump of cloud seemed to be following me. First, I thought I was out of my mind; I even knocked my head and cleansed my eyes. I looked even more closely and it was REAL!! The so called "clump of cloud"/UFO was hovering here and there moving **DIAGONALLY**, and sometimes in **ZIGZAG** patterns.

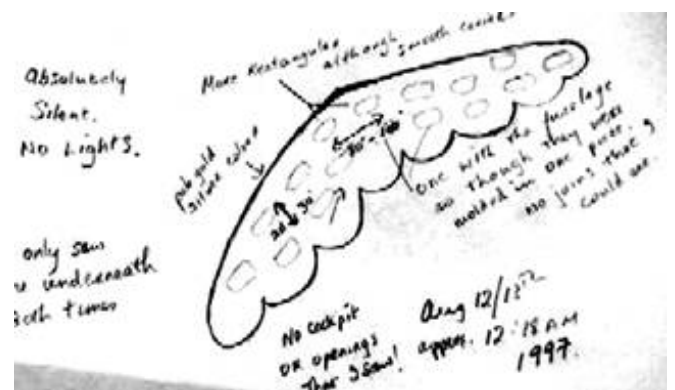

I looked around thinking it was some kind of laser show, but there was none. The whole colony was shrouded in black. The "UFO cloud" was really faint and had some kind of a light fluorescent green lining across its body, rather than a silvery one. After observing it for more than 20 minutes, I was sure that I hadn't lost my senses. I called upon my cousin, and my little brother. It scared the lights out of them. My Dad and some curious neighbors came out and were startled to see a UFO flying like that.

He called the BSS (National News Agency) and informed them about the sighting. Suddenly, after around 30 minutes or so, it vanished into thin air. Then again it appeared out of the blue, and disappeared into the dark shrouds of the clouds above. We were left startled....

I was convinced that it wasn't a normal clump of cloud because it was following a specific diagonal path, stopping to hover at frequent intervals. It seemed to be scanning the land 800 feet below it. Thanks to Peter Davenport, Director National UFO Reporting Center <http://www.UFOcenter.com>

Canada Marina in Pilot Butte

Saskatchewan -- The first night the object looked like a scalloped wing, high against the stars on August 11/12, 1997, from 11 PM, to 12:18 AM. It was much bigger than a jet plane at a high altitude and made no sound. The second night I was alone in my back yard. I spotted a flock of black birds, but this huge object sailed over my head so low I could have thrown a rock at it. It was a pale gold/silver colors just a huge wing with protuberances all over it. They looked like upturned loaf tins, about 18 inches long by about 10 inches, very smooth and no corners. It hovered over my head for several seconds, then moved about 30 feet away, then like a flash it was gone at an incredible speed.

The next day, I measured distances in my yard and figured that it was about 25 feet long by 90 feet wide. I contacted the authorities who denied any knowledge of the craft. The next day, up on a Northern Reserve a farmer found a crop circle in a field.

A few days later my red flowers had a strict demarcation line and one half was green and the other red, or one was red and yellow. My purple petunias got white flecks and white streaks. Nobody could give me a reason for the change to my plants. Thanks to MUFON Thanks to MUFON CMS

Israel Big Red Light in the Sky

Tel Aviv -- We saw a big red light in the skyline on May 23, 2011, that was bright and shiny. After a few seconds it started to fade out, but it wasn't a flare or some kind of fireworks for sure. Then it suddenly showed again the other side of the skyline again in red bright color and disappeared.

A few minutes after the sighting, at least ten military aircraft started flying all around shooting flares and looking for it! Thanks to Peter Davenport, Director National UFO Reporting Center <http://www.UFOcenter.com>

Italy Circle

FLORENCE -- I saw six bright flaming orange-red balls on May 31, 2011, floating west over the hills of San Minato at 12:15 AM. I stopped giving the downstairs students a telling off when The bright flaming orange-red balls came from nothing very bright and fast and then dissolved into almost transparent round un changing puffs with a steady light that went around it in the middle? They just drifted off, but not like a flame going out. Thanks to Peter Davenport, Director National UFO Reporting Center <http://www.UFOcenter.com>

Northern Ireland Orange fiery disk flying

Ballymoney -- On May 13, 2011 this craft was oval in shape and was bright orange as it hovered then zigzagged across the sky. It flew very fast then went straight up and vanished at 10:05 PM. It was the weirdest stuff I have ever seen! Thanks to Peter Davenport, Director National UFO Reporting Center <http://www.UFOcenter.com/>

Sweden Triangular Shaped Formation of Bright Yellow Dots

Lule -- These two triangle shape craft passed at a rather high altitude above a nearby forest on May 21, 2011, at 6 PM... The sun was a bit dimmed and I think this is the main reason we were able to see these craft since they didn't have much of a distinct shape, but about eight lights created this triangular shape.

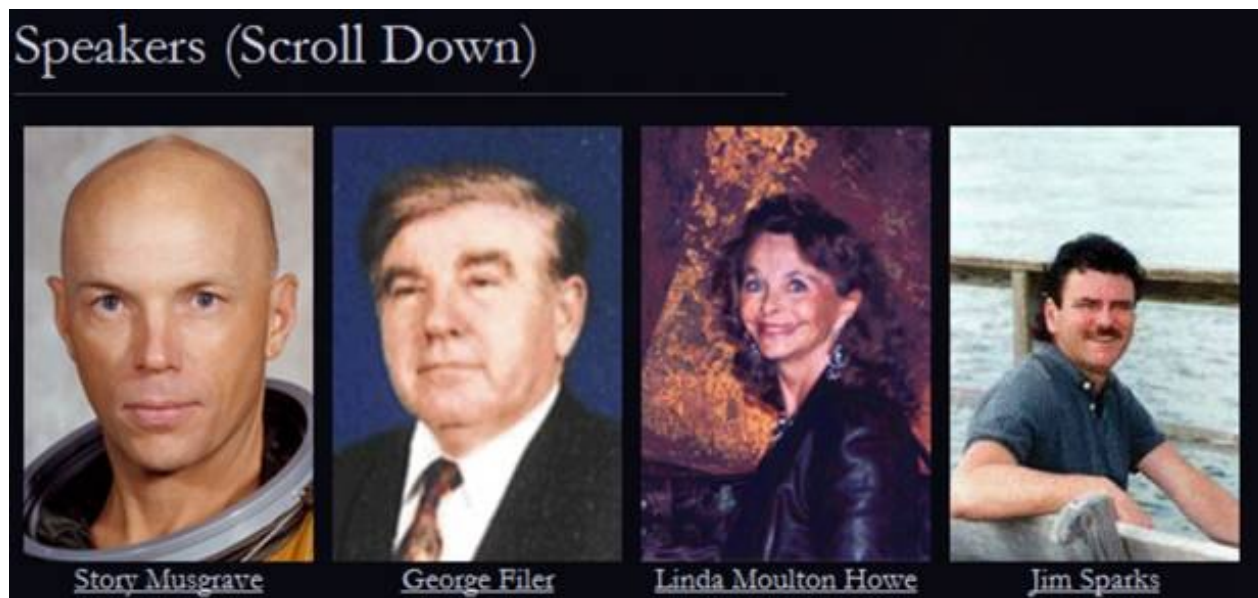

It triangles passed by very quickly, but a few friends also saw something out of the ordinary. And we agreed they made no sound and were not conventional flying vehicles. Thanks to Peter Davenport, Director National UFO Reporting Center <http://www.UFOcenter.com/>

UK/ England

West of Hucknall, Nottingham -- Lee Clements states, "I was sitting in my back garden looking towards the moon **at 9:15 PM**, on June 7, 2011, when I noticed what appeared to be a small static black object in the sky. After observing the object for several minutes I became more curious because it wasn't moving. At this point I looked at the object through my binoculars at double delta shaped object, black in color and sitting upright like a Christmas tree. The object was rotating clockwise at a constant speed. When observed with the naked eye the object appeared to fade in and out of view, but after viewing the object through my binoculars it became clear that this effect was being caused by the rotation of the object because the shape of it was wider than it was thick. This object was also observed by my wife and son who were just as bemused as I was as to the nature of this object. I can state that visibility was very good as it was still daylight and that it was not like any plane, helicopter, kite or lantern that I have ever seen before. Source: www.uk-ufo.co.uk

Support Earth Changing Research

I was sitting at my desk, pondering how I could get people interested in getting my work of the last thirteen years. I have put together a DVD of Filer's Files with hundreds of great photographs and UFO sightings.

Additionally, I have decided to include my book within the DVD that includes George Ritter's exciting abduction story by Linda Moulton Howe. Broadcaster David E. Twichell has also included much of his excellent dialog for a donation of only \$50.

We also include a year's subscription. Please include your e-mail address and mailing address.

Send check or money order to:

George Filer, 222 Jackson Road, Medford, NJ 08055.

You can also use PayPal

If you enjoy Filer's Files every week and want to support my efforts, please make a donation via PayPal

I am offering eleven years of Filer's Files on a DVD with thousands of photographs and sightings for a donation of \$50 that includes this year's subscription. Please include your e-mail address and mailing address.

JOIN MUFON!

Become a MUFON member today! Benefits of membership include a subscription to the monthly UFO Journal which contains current investigations, sightings reports, articles by world-renowned researchers and more. To join now, click here. Majorstar@verizon.net

Filer's Files is copyrighted 2010 by George A. Filer, all rights reserved. Readers may post the COMPLETE files on their Web Sites if they credit the newsletter and its editor by name, and list the date of issue. These reports and comments are not necessarily the OFFICIAL MUFON viewpoint. Send your letters to Majorstar@verizon.net. Sending mail automatically grants permission for us to publish and use your name. Please state if you wish to keep your name or e-mail confidential. CAUTION MOST OF THESE ARE INITIAL REPORTS AND REQUIRE FURTHER INVESTIGATION.

God Bless Our Troops and Georgie Filer and Eddie Pedrick my grandsons who drowned.
